Subject: Consumer right to know & maintain good health

Re: Rec 34: Review required labelling of irradiated foods

I expect FSANZ to ensure that consumers are kept well informed so that all consumers can choose what, or what not, to purchase in their pursuit of good health. To do this FSANZ must make it compulsory to LABEL IRRADIATED FOODS as well as ALL GM FOODS. The print on the label must be in a size easily readable with normal vision - or reading glasses equal to normal vision - ie without having to use a magnifying glass.
